

## About Us

Since opening our doors in 1977, our goal has been to establish long-term "vendor partnerships" and to continually build and strengthen those partnerships through communication and dedication to our customers. We adopted the tag phrase "If we don't take care of our customers, someone else will". We know it's not just a tag phrase, but a mindset and a commitment to our customers to provide the highest quality molds, dies and subcontract services in the industry. With that single minded approach to quality combined with old fashioned values and customer service, ProMold Inc. developed a reputation as a leader in our industry for building small complex, high tolerance molds and EDM subcontract services.

Through the years we recognized the need for growth to remain competitive in the ever changing global market. In 2007, we acquired the assets of one of the finest mold making facilities in the country, Gauer Mold and Machine. With all the resources in house from design and development, through complete manufacture, the synergy that has developed between the two companies is undeniable. Housed in a 29,000 square foot air conditioned facility, ProMold-Gauer can now provide a service to its customer's that it could not do in the past, we now have the ability to machine and build larger tools. By using a team driven approach and drawing on all the experience of our talented employees, ProMold-Gauer can provide anything from a small complex, high tolerance plastic injection mold, to a large 40,000 lb. structural foam mold.

Today, we are constantly setting new standards of excellence by upgrading machine tools, software and training for our workforce. Over the years we have remained committed to our original goal by offering our customer's reduced pricing, accelerated deliveries and not only meeting, but exceeding our customers' expectations.

To learn more about our company, we encourage you to look at the company we keep. You will discover that the reputations of our clients say a great deal about the level of quality you can expect from ProMold-Gauer Inc. We invite you to visit our facility in northeast Ohio, or contact us to discuss any of your manufacturing needs. We look forward to serving you now and well into the future, because we know, if we don't take of our customer's, someone else will.
