

Complete Bench Services

ProMold-Gauer has 6,000 square feet permanently allocated to polishing, assembly and inspection of molds and components. Overhead cranes service the entire bench area, which has complete facilities for fitting, benching, piping and wiring. Our 20 ton crane can accommodate virtually any size mold as well as two 100 ton fitting presses to insure that shut offs are fit properly. In addition to our in house welding to assist with any repair needs, we also offer complete preventative maintenance programs. We have loading docks available for loading and unloading of all shipments.
